

ergonomic signmaker table

ERGONOMIC SIGNMAKER TABLE

tilting function

The table can be tilted at an angle up to 22 degrees, both left and right. This function gives you the opportunity to always work ergonomically correct.

adjust the height

You can adjust the height between 84 and 114 cm. This allows all users to work at the perfect height. Use low position with heavy jobs, and high position for details. The control panel is available on both sides of the table.

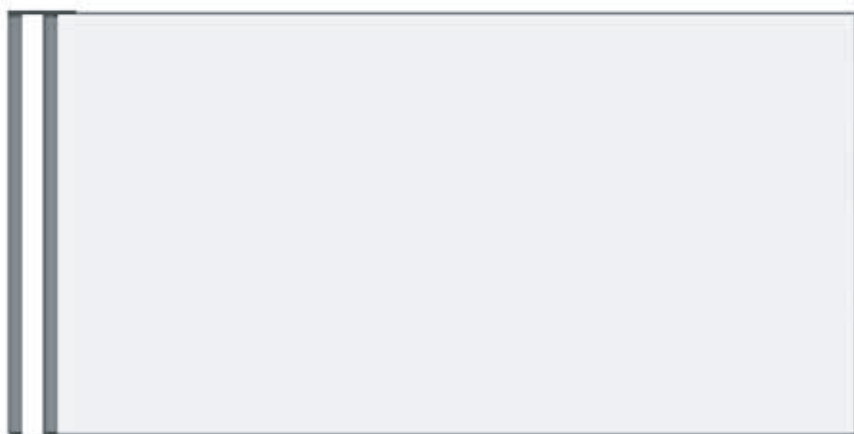

build-in battery

The table has a build-in battery, which makes it possible to operate in places without power. You can use the battery for one week, before you need to charge it. The table has a memory setting, for different positions.

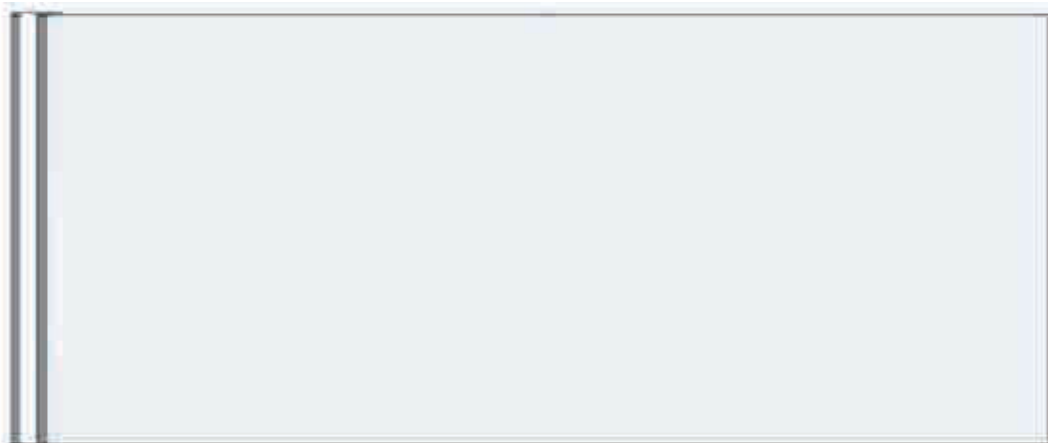

WHAT IS YOUR SIZE?

signmaker table
large
1300x2500 mm.

signmaker table
x-large
1700x4000mm.

FUNCTIONS SIGNMAKER TABLE

Sturdy actuators
Every corner of the table is fitted with an actuator by Linak - one of the leading producers of high quality actuators.

Anti-static wheels
The anti-static wheels prevent static build up, when the table is moved. They can be locked to ensure your safety.

Build-in shelves
There are shelves in both sides of the table for convenient storage of tools.

5mm cutting mat
The cutting mat is self healing, and enables you to cut directly on the table without damaging it.

Application dispenser
Can be used for application tape, vinyl and print. Now 1 person can do a 2 man job.

Ergonomic
The table is built to last, and provide you with an ergonomic way to do your work.
